CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

June 23, 1995

State Water Resources Control Board
Division of Water Rights
P.O. Box 2000
Sacramento, California 95812-2000

Gentlemen:

Supplemental Statements of Water Diversion and Use

In accordance with the Water Use Inventory Law (Part 5.1, Division 2 of the California Water Code), enclosed are 22 "Supplemental Statements of Water Diversion and Use" (Statements) for 1992, 1993 and 1994. Section "D" of the Statements has not been completed as there has been no change in the requested information since the previous reporting period. Section "F" is not applicable to any diversions being reported by the Los Angeles Department of Water and Power (Department) this reporting period.

Normally the Division of Water Rights (Division) sends out blank Statement forms for only those diversions for which Statements are due in accordance with the Water Use Inventory Law. As you know, the Water Use Inventory Law requires water users to file Statements for their diversions every three years. This year the Division supplied the Department with blank Statement forms for all 166 diversions for which the Department must file Statements and requested the Department complete all 166 Statements, with flow data complete through calendar year 1994, by June 30, 1995.

As the Department had filed completed Statements for 144 of these diversions just last year and was not required by the Water Use Inventory Law to refile these statements until 1997, Mr. Raymond R. Prittie of my staff called Mr. Murt Lininger, Program Manager, Applications and Hearing Section of the Division on March 24, 1995 to inquire as to why the Division was making such a request. Mr. Lininger informed Mr. Prittie that the Division was attempting to change the way in which Statements are submitted so that all Statements would be submitted at the same time instead of being spread over three

Recyclable and made from recycled waste.

years as is currently the case. He said this one time change had been requested by many of the water users to simplify their reporting requirements.

Mr. Lininger informed Mr. Prittie that because there was no legal requirement for the Department to submit Statements for all 166 diversions this year the Department is only required to submit Statements for the 22 diversions for which Statements were originally required.

The Department feels the reporting change which the Division is making is a beneficial one and will simplify reporting in the future. Due to the significant amount of labor required to calculate and file the large number of Statements the Department is responsible for filing and the fact that the Department had not planned on having to recalculate all of its gaging station data and refile all of its Statements again this reporting period the Department will only be filing the required 22 Statements by the statutory filing deadline of June 30, 1995. If time and labor availability permit the Department will attempt to complete and file the balance of its 166 Statements, with flow data complete through 1994, prior to June 1997 so as to have all of the Department's Statements due at the same time (June 30, 1998) as desired by the Division.

Two other changes the Division incorporated this year were to 1) request the water users supply the county assessors parcel number for each diversion being reported and 2) request a "Statement Information Sheet" (SIS) be completed for each diversion to the best of the water users ability. The Division indicated in the notice which was sent out with the blank Statements that this information was being requested to update the Division's new data base. Mr. Lininger informed Mr. Prittie that although there was no legal requirement for the Department to provide this information, it was being requested to permit the Division to be better able to respond to public inquiries regarding water rights, primarily from parties considering real estate transactions involving water rights.

The Department appreciates the Division's desire to enhance its service to the public but, as Mr. Prittie indicated to Mr. Lininger, the Department's diversion and use locations are scattered over hundreds of square miles, many in relatively remote locations and therefore the labor required to complete the SIS forms for all of the Department's diversions would be prohibitive. In addition, as Mr. Prittie and Mr. Lininger discussed, most of the information would be of little value because of 1) the low probability that any City owned land with water rights would ever be sold and 2) a City of Los Angeles (City) Charter provision which prohibits the sale or transfer of City water rights attached to City land even if the land itself is sold or transferred. The Department will therefore not be returning completed SIS forms for any of its diversions at this time. The Department may provide this information in the future if time and labor availability permit.

June 23, 1995

If you have any questions regarding the above, please contact Mr. Prittie on
(213) 367-1031.

Sincerely,

HENRY R. VENEGAS

Engineer in Charge

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1992. (Additional information on reverse side of this form.)

- A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.
- Amounts ☐ Gallons
below are: ☒ Acre-feet
☐ _____ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1989	0	0	0	0	0	0	0	0	0	0	0	0	0
1990	0	0	0	0	0	0	0	0	0	0	0	0	0
1991	0	0	0	0	0	0	0	0	0	0	0	0	0

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation _____

Stockwatering _____

Domestic _____

Other (specify) _____

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockpounds Constructed Prior to 1969"

"Appropriation of Water in California"

DIVISION OF WATER RIGHTS
STATEMENT OF WATER DIVERSION AND USE

S4388

L.A. B-24

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water City of Los Angeles
Address Box 111, Los Angeles, California
B. Name of body of water at point of diversion Owens River
Tributary to Owens Lake
C. Place of diversion SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 34, Township 6S, Range 33E, MD B&M,
Inyo County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works A. O. Collins Canal - Intake

E. Capacity of diversion works 60+ cubic feet per second
gallons
acre-feet

Capacity of storage reservoir
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1967	0	0	0	0	1831	1811	3118	3467	1082	0	0	0	11309

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years 11309 ~~acres~~ ~~acre-feet~~
Minimum annual water use in recent years 0 ~~acres~~ ~~acre-feet~~

Type of diversion facility: gravity ☒, pump ☐

Method of measurement: weir ☐, ~~meter~~, ~~gauge~~, Section, electric power meter ☐, water meter ☐, estimate ☐

F. Purpose of use (what water is being used for) Spreading, irrigation and stockwatering

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) In Sec. 34, T6S, and Secs. 3, 2, 10, 11, 14, 24, 25 & 36, T7S, R33E, and Secs. 30 & 31, T7S and Sec. 6, T6S, R34E, MDB&M

H. Year of first use as nearly as known 1878

I. Name of person filing statement Robert V. Phillips
Position Chief Engineer of Water Works and Assistant Manager Organization Department of Water and Power
Address Box 111, Los Angeles, California 90054

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
